The application provides easy and reliable Internet access in situations where a specific website is blocked, while at the same time preventing the user from visiting other websites. The most common way to deal with this situation is to use a proxy server. To bypass the block and gain access to websites like Facebook, YouTube, Twitter, Wikipedia, Amazon, eBay, The Pirate Bay or other useful services, it is necessary to have a connection through a proxy server. ChrisPC Anonymous Proxy Pro provides you with multiple preconfigured proxy servers to connect to the Internet so that you will be able to avoid the block. Furthermore, it comes with a filtering module that blocks advertisements, page counters and tracking scripts. This way, you can have a clean and clear browsing experience while still being able to access your favorite websites and services. With just a single click, you can add a new proxy server to the list and select one of the presets to connect to the Internet. Also, you can configure how many seconds it will take to load the page so as to ensure that your Internet connection speed is not impacted. There are a lot of websites that are restricted for a specific region or countries, so by connecting to the Internet using a proxy server you can bypass the block and access the online services that are blocked for you. ChrisPC Anonymous Proxy Pro can be used to bypass censorship on specific websites, so that users located in countries with Internet restrictions may browse them. Addition to the regular use of the application to support the maintenance of the proxy server, it is possible to receive a couple of other advantages: - Notification that an update to the application is available - A monthly archive of the proxy server for analysis - The possibility to choose from a number of servers, so as to not be restricted to using the proxy server that is being used as the basis of your account - Addition of extensions in the settings of the proxy server - Ability to set up a password for the proxy server - Ability to change the DNS server of the proxy server With ChrisPC Anonymous Proxy Pro, you can choose from a number of proxies to access the Internet and the content of websites without restrictions. The application is entirely free to use and is in use by millions of users. This application allows you to find torrents, movies and music on torrent websites. Once the torrent link is open, it will be placed in a queue, where you can see the name of the file you are looking for, the total size, the torrent magnet link, the link to the magnet and the date when the torrent was created. Even though you will be able to download the content directly from the torrent website, you can also save the torrent file on your computer, so you can share it with other people or save it so you can share it later. Why should you use it? There are several reasons to use a torrent application. For one, if you are not a skilled computer user, you can save time by not having to download the files from the torrent website. Once they are downloaded, you can simply enjoy the content. You can also download torrents for the files that you are not interested in, as they will be automatically placed in a queue that you can see. The application also makes it easy to use the torrent website in a more efficient way, by automatically placing all the files that you are looking for in a queue. You can even select the download options you want and perform all the downloads with a single click. If you are looking for a download manager that works on your PC, you should try ChrisPC Download Manager Pro. This application is designed to download torrents and media files faster and more easily.
