## **What's new in Pirate Mosaic Puzzle. Caribbean Treasures:**

**Here we have our first soundtrack in many months. Originally I had meant to have a sequel installment. Lately I have been shooting more and more, so to be able to get this out, I had to push back all my other projects. The film continues from where we left off in Found a Way to Do It. Thanks for bearing with us. I am just getting caught up on almost all of this. I still have an idea for an anthology of sorts. It will cover the mid to late 80's all the way through the early to mid 90's. I will be starting in the Fall, if you feel like this is something you would be interested in. So, as I was saying, the film continues from where we left off in Found a Way to Do It. This time however, we will follow Jill and Chase's younger daughter as she calls on her father's help when she wants to start dating. Like any child she wants to get her little heart set on one and she wants her daddy to approve of this suitor. She knows all her daddy's secrets and being that she is the 21st century generation where age is everything, she is concerned and wants to know. I think he may be having second thoughts about Jill. Now, the daughter is heartbroken and hides outside her bedroom to hide her tears until she can talk to her daddy and make everything alright again. She ends up getting the phone call she wants and finds the young men very attractive. The only dilemma, just like with her older sister is that there is no father figure in this scenario. Daddy here is the older and wiser of the two as well as the more handsome one. So of course daddy, or should I say, daddy steps in; the one that is supposed to be the Godfather. I decided to try to make this as good as I could while still staying true to the film. I attempted to write an orchestration that played on the age of the character, which sounded a bit more modern than any orchestra I have ever done. Of course, I started writing the project and decided that if I was going to do it, I was going to make it more of a stand alone album. So I decided to allow each musician to have one part (a song) on the original music. I want the music to come across as more of my "fantasy" music. My ideas are what really inspired this project. In the first installment**
