It is one of the most powerful and easy to use.Q: How to get the list of DB connections currently in use for SQL Server 2005? If there are more than one connection for a SQL Server 2005 server, how to get the list of currently in use connection? EDIT: I'm not looking for a list of connection string parameters, like Connection String Parameters. I need the list of DB connections in use with their name and other configuration properties. A: If you don't have a GUI for SQL Server Management Studio, see this page: 6d1f23a050
